Summary

Senior Data Architect and IT Engineer with 14 years of experience delivering scalable Business Intelligence and cloud data solutions across government, insurance, banking, and energy sectors. Experienced in designing enterprise data architectures, leading cross-functional teams, and driving end-to-end delivery from stakeholder requirements to production deployment. Strong expertise in modern Azure based data platforms, with a hands-on approach to implementation and a growing focus on Generative AI-driven analytics.

Experience

Data Architect - Exakis Nelite

Grenoble, France | 08/2023 – Present

Client: TotalEnergies (2 years – Current mission)

- Designed and implemented flexible data architectures aligned with business use cases, including Lakehouse solutions (Azure Databricks + Unity Catalog), Enterprise Data Warehouses for structured reporting, and on-premises databases for highly confidential data.
- Delivered Power BI dashboards tracking strategic KPIs across multiple domains: Environmental (GHG emissions, drilling, flaring), Transportation, Office Management, and Catering operations.
- Acted as Technical Lead, leading stakeholder workshops, defining the product backlog, driving solution design, and coordinating consultants delivering data use cases.
- Led Generative AI initiatives using Databricks Genie and Databricks Apps, enabling conversational analytics and natural language access to enterprise data.

Tech Stack: Databricks, Unity Catalog, Azure Data Lake Storage, Azure Data Factory, Power BI, Denodo, GitHub, JIRA, Confluence

Client: Framatome (7 months)

- Designed a data mesh-oriented platform architecture in Azure to support domain-driven data ownership and scalability.
- Implemented Azure infrastructure aligned with the Microsoft Cloud Adoption Framework, ensuring governance, security, and operational best practices.
- Migrated selected on-premises use cases to the Azure Data Platform, modernizing legacy workloads and enabling cloud-native analytics capabilities.
- Developed Power BI reports to support monitoring and planning of nuclear reactor maintenance activities.

Tech Stack: Azure Databricks, Power BI, Azure Storage Accounts, Azure Data Factory, Azure Purview, Azure Monitor, Azure Log Analytics, Azure DevOps

Senior Data Engineer and Team Lead - BI4ALL
Business Intelligence Consultant - BI4ALL

Lisbon, Portugal | 04/2019 – 07/2023
Lisbon, Portugal | 03/2017 – 03/2019

Client: Crédito Agrícola (6+ years)

- Led a multidisciplinary team of data engineers and software developers delivering critical banking data solutions.
- Built and maintained high-trust client relationships, designing and evolving scalable data applications supporting Accounting, Sales, and Risk domains.
- Conducted stakeholder workshops, translated business requirements into technical solutions, and managed project planning, estimation, and delivery.
- Designed and implemented enterprise Data Marts following Kimball methodology best practices.
- Led the architecture and execution of a lift-and-shift migration to Azure, modernizing legacy data infrastructure.

Tech Stack: Azure Data Factory, Azure Databricks (Python, Medallion architecture), Azure Data Lake (Delta format), Logic Apps, SQL Server, Azure Analysis Services, DAX, Power BI (embedded), Azure DevOps, Git

Analyst Programmer - Accenture
Associate Programmer - Accenture

Lisbon, Portugal | 09/2014 – 03/2017
Lisbon, Portugal | 09/2012 – 09/2014

Client: BPO Insurance (Tranquilidade, Logo, Lusitania, NSeguros, Açoreana, VIG) — 3 years

- Developed Business Intelligence solutions for multiple insurance companies, delivering reporting and advanced ad-hoc analytics.
- Optimized database performance through SQL query tuning and indexing improvements.
- Collaborated with cross-company stakeholders to gather requirements and translate them into reporting solutions.
- Gained first leadership experience through task estimation and coordination of a small team.

Tech Stack: SAP BusinessObjects, SQL Server Analysis Services (Tabular), DAX, SSIS, Reporting Services, Power BI

Client: Ministry of Health of Angola — 1 year

- Developed ETL processes integrating data from multiple geographical sources.
- Implemented a centralized Data Warehouse serving seven hospitals nationwide.
- Delivered analytical reports supporting national healthcare decision-making.

Tech Stack: Talend, MySQL, SpagoBI, Jasper Reports

Client: Ministry of Social Security of Angola — 1 year

- Delivered high-precision financial and operational reports for government stakeholders.

Tech Stack: Microsoft Reporting Services (embedded in Dynamics NAV), SQL Server 2008

Education

Polytechnic Institute of Bragança | 2008 – 2012

- Bachelor's in informatics engineering (ECTS grade A)

Certifications

Databricks Certified Data Engineer Associate	2025
Fabric Analytics Engineer Associate	2024
Azure Administrator Associate	2022
Azure Data Engineer Associate	2021
Azure Database Administrator Associate	2021
Power Platform Fundamentals	2021
Azure Fundamentals	2021
Microsoft® Certified Solutions Associate: SQL Server 2012/2014	2019
